## Cogiscan and Totech Announce Partnership

**BROMONT, CANADA, October 2016** — Cogiscan Inc. and Super Dry Totech, today announced a new partnership. This collaboration enables Totech to seamlessly integrate their equipment to the TTC solutions developed by Cogiscan. This technology, combined with the Super Dry® robotically controlled Dry Tower storage management systems, enables a more complete solution for Totech customers.

Cogiscan is the leading Track, Trace and Control (TTC) solutions provider for the electronics manufacturing industry, and Totech is one of the top providers of ultra-low humidity storage and management systems.

In the spirit of Industry 4.0 this will enable the companies' common customers to benefit from a seamless solution to leverage the capabilities of both systems. An additional benefit of the Cogiscan TTC interface is that Totech customers will be able to seamlessly integrate the Totech towers with other types of machines and with enterprise systems such as MES, NPI, PLM and ERP.

### **About Cogiscan Inc.**

Cogiscan is the leading track, trace and control (TTC) solutions provider for the electronics manufacturing industry. The scalable Cogiscan platform perfectly integrates with all major equipment types, and is highly configurable to enable a personalized solution to each customer's specific production needs. Since 1999 Cogiscan has attained several international patents for TTC hardware and software, and has won multiple awards throughout the years. ### **About Super Dry Totech**

Delivering globally to the world's top tier OEM and EMS companies, Super Dry Totech is the industry measure for ultra-low humidity storage and management. Proper control of moisture sensitive devices (MSDs) per IPC and JEDEC standards has become more critical than ever since the introduction of lead free. Boasting <1% relative humidity control and the fastest recovery times, Super Dry cabinets are available in a wide range of sizes and capabilities, all with certified performance

control measures. Product development has moved beyond dry cabinet and MSD storage, including various floor life reset alternatives and low temperature long term storage. Now, with the introduction of automated Dry Tower systems, the company addresses the entire logistics management process. <http://www.superdry-totech.com>
